 Harshil Upadhyay

Languages (Spoken): English, Hindi, Gujarati

SKILLS

Languages: JavaScript, Java, Python, C

Frontend: React.js, Next.js, Tailwind CSS, SCSS, HTML5, CSS3

Backend: Node.js, Express.js, REST APIs, Socket.io

Databases: MongoDB, PostgreSQL, Mongoose

Authentication: JWT, Bcrypt

Tools: Git, GitHub, Postman, Vercel, Render

TECHNICAL HIGHLIGHTS

- Built full-stack applications using React, Next.js, Node.js, and PostgreSQL
- Developed secure authentication systems with JWT and protected routes
- Designed scalable REST APIs with validation and centralized error handling
- Implemented realtime features using Socket.io
- Built responsive and interactive frontend interfaces with modern UI patterns

EDUCATION

B.Tech CSE (AI & ML) – Adani University | CGPA: 8.4 (2024–Present)

Expected Graduation: 2028

XII (GSEB) – Tripada Day School — 86.46% (2024)

X (GSEB) – Tripada Day School — 80.5% (2022)

LEADERSHIP & RESPONSIBILITIES

Web Development Head – ASPDC Coding Club, Adani University

(3rd Semester – March 2026)

Lead the web development team of the college coding club. Responsible for guiding members, planning technical tasks, maintaining the club website, managing updates, and collaborating with the core team to execute events and initiatives.

PROJECTS

Restaurant POS style Dashboard (ODOO X INDUS) |

GitHub : <https://github.com/Harshil000/odooXindusXfinal>

- Built scalable full-stack POS system using React, Node.js, Express, and PostgreSQL
- Developed REST APIs for orders, payments, customers, and analytics workflows
- Implemented JWT authentication, protected routes, and realtime updates using Socket.io
- Integrated Razorpay payment workflows with verification and refund support
- Built responsive frontend with modular routing and centralized auth management

AI-Based Crop Disease Detection | GitHub: <https://github.com/Harshil000/SIH>

- Built a full-stack application for plant disease detection using ML models
- Designed REST APIs using Node.js & Express for handling image uploads and predictions
- Implemented optimized image processing pipeline
- Developed responsive frontend using Next.js

Excalidraw-Inspired Drawing Platform |

GitHub: <https://github.com/Harshil000/BatchShowdown> |

Live: <https://batch-showdown.vercel.app/>

- Built browser-based drawing platform using JavaScript, HTML5 Canvas, CSS3, and SCSS
- Implemented draggable, resizable, and rotatable elements with persistent canvas state
- Developed layer management, text editing, export functionality, and keyboard controls
- Optimized rendering performance using requestAnimationFrame and minimized DOM updates
- Added persistent canvas state using localStorage, allowing drawings and layouts to remain saved after reloads and browser reopen

Flappy Bird Clone Game | GitHub: <https://github.com/Harshil000/FlappyBird> |

Live: <https://flappybirddemohu.netlify.app/>

- Built responsive Flappy Bird clone using HTML5 Canvas, JavaScript, and CSS3
- Implemented collision detection, gravity physics, procedural obstacle generation, and scoring
- Added persistent leaderboard storage using localStorage with keyboard and touch controls
- Integrated sound effects, mobile optimization, and customizable themes

ACHIEVEMENTS

- Winner, Odoo x Indus Hackathon - Built [Restaurant POS & Operations Platform]
- Runner-up, CodeCharades (Frontend Hackathon, Adani University)
- Bronze Medal, Kata Karate (2017)
- Senior Green Belt in Karate
- Olympiad Silver Medal (Maths)
